Ad for Lap Band Started Process

Stephnie's road to Lap Band surgery began when she heard an ad for it on the radio. From there, she called and made an appointment.

"I'm so glad I came to TopSurgeons," Stephnie went on to say. "The doctor I had has called me several times to see how I'm doing....in fact he asks me why I don't call. The staff has been wonderful to me."

Stephnie's long-term goal is to remain healthy and she believes having had the Lap Band surgery will help her in that success.

To date, Stephnie has lost 23 pounds following the procedure, with more to come. She says with a smile that she wants to be able to fit into the clothes that are hanging up in her closet.

"I feel inspired and this procedure changed my life," Stephnie commented.

Are you one of those people who want to do something about their weight problem, but have not yet taken the initiative to do it? If so, give TopSurgeons a call today for a consultation and to learn more about surgery to get your weight problem under control.

More Lap Band surgeries are done with TopSurgeons than any other provider in California.
